RE: Change to Preliminary Director's Report 27-12069
Notice of Amended Claim to Water Right 27-12069

Dear Charles:

Following up on our telephone conversation this past Saturday enclosed please find a Notice of Amended Claim and a Preliminary Director's Report with a map of the place of use.

As we discussed the acreage on the amended claim has been increased to include the irrigated acres in Lot 17. I left the quantity on the amended claim at 0.40 cfs (20 miners inches). Please sign the claim in the presence of a Notary and return to this office.

The Preliminary Director's Report reflects the increased acres but only shows a quantity of 0.30 cfs (15 miners inches). This quantity is based my understanding of how the water right was conveyed based on deeds that were obtained from Bingham County. If you have documentation to corroborate the 1909 Quitclaim please provide it. You are certainly welcome to meet with me and review the documents I relied on to make the recommendation. Please retain this report and the map for your records.

The Department expects to submit to the Snake River Basin Adjudication Court all recommendations for the Blackfoot Drainage, Basin 27, by November 10, 2005. At that time you will receive Director's Report for your water right, which should mirror the revised preliminary recommendation. The Director's Report mailing will not include a map.

Naturally if you have questions please call me at the above phone number.

Respectfully Submitted,

Ernest Carlsen
Water Right Supervisor
