Narrative by Cindy Bird
July 25, 2002

Photo 1. Looking West

Photo 2. Looking north

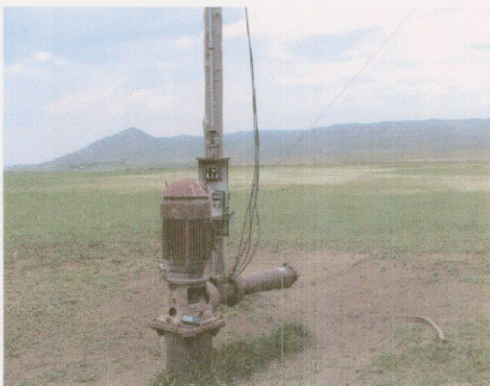

Photo 3. Looking north.

July 22, 2002 I met with Craig Crandall with Crandall Farms to visit the site under the adjudication claims. Photo 1 is looking west at 50 hp Fairbanks-Morse motor #F456823. The pump is a Fairbanks-Morse Pomona pump with an unreadable nameplate. This is the same system described in the original engineering report in September of 1968. The GPS location is N42 degrees, 51.481 minutes, W111 degrees, 55.067 minutes.

Photo 2 was taken looking north at the pond. From the examiners report it appears that the pond area has increased with a channel that runs north and then T's and goes east and west by the road.

Photo 3 was taken looking north at an abandoned 15hp pump. This pump is west of the 50 hp pump located in the SENW of section 32. The original application for permit was amended to include this 15 hp pump but it appears that it was never developed and proved up on.

The nameplate on the pump was unreadable. The motor was a Fairbanks-Morse motor serial number PT3515. The GPS coordinates are N42 degrees 51.482 minutes and W111 degrees, 55.253 minutes.

The place of use under this claim has not changed. The 315 acres is still irrigated with this license and Portneuf water. The mainline runs east and west from the well. They use both wheel lines and hand lines on this piece.
