NOTICE OF ERROR
REPLY

Please type or print clearly, fill out this form completely and mail.

Return this reply form to IDWR by the deadline date printed below if you want IDWR to change your recommendation or you want to let IDWR know that you agree with its recommendation.

YOUR DEADLINE FOR RETURNING A NOTICE OF ERROR REPLY IS: April 21, 2003

Water right number: 29-2415

CRANDALL FARMS INC

2919 HANSEN RD

BANCROFT ID 83217

Telephone Number: (208)648-7301

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

total irrigated acres

2. Describe the changes you wish to make in the proposed recommendation:

*original claim is 315 acres
proposed claim is 294 acres*

3. Give a brief explanation as to why you disagree with these portions:

☐ I AGREE with this proposed recommendation: no changes need to be made.

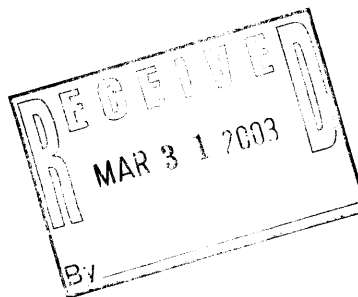

DATE: 31 MAR 03

SIGNATURE: *Craig Crandall*

Please print your name:

Subject: Notice of Error Reply

Dear Craig:

Thank you for taking the time to respond to the notice of error for your basin 29 rights. You noted on your Portneuf River, Toponce creek and the Twenty-four mile creek rights that the recommended acres were smaller than the originally claimed acres. I'll break down each area and explain the differences.

Of course the short answer is that K.V. Hansen over claimed the number of acres that can be irrigated from each source. In the Union Grain and Elevator decree the water was decreed at an inch per acre. In the example of Toponce water, K.V. Hansen claimed water that was not decreed to his property. If you feel that water should go with the ranch please provide me with evidence to support your claim. The water recommended for Toponce matches the number of possible irrigates acres.

The Portneuf river rights originally claimed 1477 acres and your Twenty-four rights claimed 582 acres. We do take out for roads, homes, outbuildings, coral and other item that are not irrigated. So the recommended shape ended up being 1400.7 acres on the river rights and 572 on Twenty-four mile rights. The limited number of irrigated acres under your river rights are 623 acres ($1400.7 - 623 = 777.7$). However, there is an overlap in the place of use with your Twenty-four mile rights of 137.75 acres. So the difference between the two is 639.95 acres ($777.7 - 137.75 = 639.95$). But we also have the well that is located in the SENW of section 32 that allows for 57.5 acres of irrigation. So, if we subtract that from your recommended place of use you get 582.45 ($639.95 - 57.5 = 582.45$) acres. That is the number of acres if irrigated needs to have an enlargement claim filed on it. Because Portneuf water is limited to irrigate 623 acres and Twenty-four mile water is limited to 137.75 acres with the well another 57.5 acres. These three sources are NOT ADEQUATE to irrigate the entire place of use at an inch per acre. The enlargement claims that you filed under 29-13428 and 29-13429 were filed to cover the additional acres. Just a reminder the enlargement claim allows you to spread the water thinner over more acres but it does not increase the flow.

If you have any additional questions please feel free to contact me at 547-3993.

Sincerely,

Cindy E. Bird
Adjudication Bureau

Notes

- 5/22/03 NOE Reply: 29-2415 Brindall Farm.
- Original claim was for 315 acres.
 - Recommending 294 acres?

Have Allen or Roger check the recommended shape with the GCD. The section - 00 lines look like they are off.

At an inch per acre the diversion rate will irrigate 57.5 acres. Took out for the road and the canal that has been dug along the north line of the property and south to the P.O.D.
