

10/15/01 W.L. Hatch (Alan Smith) 29-2431A.

I visited the point of diversion on 10/3/01 when I visited the Thompson Brothers. The well hasn't been working the last few years. The Spring of 2002 Alan is installing a new Mainline. The land was irrigated prior to 1987 with this well under this license.

The other part of this acreage is claim by the Thompson Bro.

✓ the irrigated acreage under 29-2431A & 2430A.

This POD was GPS'd on 10/3/01 when examining Thompson Brothers - Photo's were also taken at that time. Photo 163.

GPS point: Thomp tag# A0004522.

W.L. Hatch is going to determine when the POD changed.

The acreage is the same number of acres; it's only change in the number of acres in each QQ.

This property is next to the hay shed, by Thompson Brothers.
