Re: Well Interference

When I did the Adjudication field exams for Mr. Barry Williams, he took me to two wells which he alleges are interfering with the flow of Bannock Creek. He called again today, and I also have received e-mail from Shoshone-Bannock Tribal Water Engineer Elese Teton asking about these wells.

The attached letter is my response to Mr. Williams.

Williams alleges this well was forfeited for a number of years then resumed. It was in use when we drove by. See GPS data 8-28-01. The well we saw was on the ^{South} ~~North~~ side of a county road in a farm yard.
