I. FINDINGS OF FACT

A notice of claim was filed for this water right pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources examined the water system for this reporting area. The *Director's Report* contained a recommendation for the elements of this water right. The *Director's Report* described this water right by digital boundaries.

Objections were filed by Kenneth Andrus, Lava Irrigation Co., Inc., and the United States Bureau of Land Management. The United States Bureau of Land Management's *Objection* was resolved with a *Stipulation to Resolve Objection* filed on July 8, 2004. The remaining *Objections* were resolved with the filing of the *Portneuf River Settlement Agreement Basin 29: Portneuf River* (hereafter "*Portneuf River Agreement*").

II. ANALYSIS

A. Portneuf River Agreement

This *Special Master's Report and Recommendation* recommends this water right with the elements and administrative provisions set forth in the *Portneuf River Agreement*. (April 22, 2005) Specifically, the *Portneuf River Agreement* sets forth provisions for an extended season of use, administration of an upper and lower division, allocation of rights within each division,

measurement at the Topaz Gauge, administration on East Bob Creek and West Bob Creek, and modification of the diversion structure.

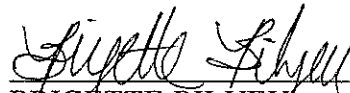

B. Digital Boundary

The place of use element for this water right is described by a digital boundary rather than with legal subdivisions such as Township, Range, Section, and Quarter- Quarter designations. The place of use agreed on by the parties and IDWR is illustrated by the map overlay attached to the *Recommendation for Partial Decree*. The digital boundary for the place of use is described on the CD-Rom filed July 8, 2003.

III. CONCLUSIONS OF LAW

Therefore, based on the file and record herein, IT IS RECOMMENDED that this water right be decreed with the elements set forth in the attached *Special Master's Recommendation for Partial Decree*.
