Ref: Snake River Basin Adjudication (SRBA)
Claims 27-2043 and 27-11359.

Subject: Discrepancies in the adjudication

Response Date: November 24, 2003

Dear Claimant:

I received the information you sent with the ownership change for claim 27-11359. Clyde C. Anderson also filed claim 27-2043 for some reason this claim number was not included on the ownership change form so I have added it.

Claim 27-2043 with a 1915 priority date was licensed for irrigation and domestic use at a total diversion rate of 0.56 cfs. In the adjudication, the claimed overall diversion rate is 0.72 cfs and stock watering was added. The domestic component on the license includes stock watering. Therefore, the additional stock watering will not be recommended to the SRBA court and the diversion rate will be recommended at the licensed rate of 0.56 cfs.

After further review of the license some additional question arose. It appears that both claims irrigate the same place of use except for apiece located in the NWNE of section 26. They also claim the same points of diversion and source. This right was licensed at a half inch per acre per the Idaho Code. Why is the additional water necessary? Also, the patent record sent in for evidence of priority on claim 27-11359 does not match the legal description on the claim. Without some additional information and clarification on these items then claim 27-11359 it will be recommended as "Disallowed" to the SRBA court.

If you have any additional questions please feel free to contact me at 547-3993.

Respectfully,

Cindy E. Bird
