NOTICE OF UNAUTHORIZED WELL USE

Dear Mr. Hatch,

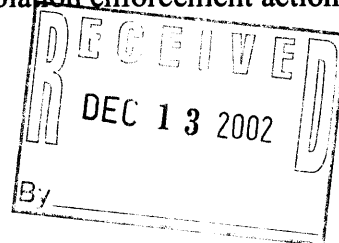

On June 24, 2002, the Idaho Department of Water Resources inspected a well located in $\frac{1}{4}$ SW, $\frac{1}{4}$ SE, Sec. 34, T.6S, R.39E that appears to be under your ownership and operation. A copy of our field inspection report and a map with the well identified as 29-Illegal-3 is enclosed for your review.

The results of our field inspection show the well is used for injection of agricultural runoff water through open slots in the surface casing of the well. Injection of surface water into a well greater than 18 feet deep is prohibited without an injection well permit under Rules and Minimum Standards for Use and Construct of an Injection Well, IDAPA 37.03.03. Analytical results from water quality samples collected at the pond show the water contains total coliform and e-coli bacteria concentrations that exceed water quality standards at the point of inject under Rules and Minimum Standards for Use and Construct of an Injection Well, IDAPA 37.03.03. The well must be abandoned or constructed in a manor for production purposes that meets Well Construction Standards Rules, IDAPA 37.03.09.

Please contact me within 30 days by telephone at (208) 327-7885 or at the address listed above to discuss a resolution to this situation. At this time, we are seeking your cooperation in this matter before pursuing a Notice of Violation enforcement action.

Sincerely,

Chris Duncan, UIC Program

7. Conclusion(s) Is well in permit in compliance? ☐ yes ☒ no

Production well with slot cut into surface casing designed to inject surface water into well from pond. NO injection well permit. Production well NOT CONST. TO WELL CONST. STANDARDS.

Sample collected from pond at well head. NITRATE ANALYSIS WAS NOT PERFORMED BY LAB, NO RESULTS.

7. Corrective Action(s) / Recommendations(s)

WELL REQUIRES AN INJECTION WELL PERMIT OR NEEDS REPAIRS TO MEET WELL CONST. STANDARDS FOR A PRODUCTION WELL.
