

A29-2538 and A29-73C
William Jean Treasure
Narrative by Cindy Bird
June 10, 2002

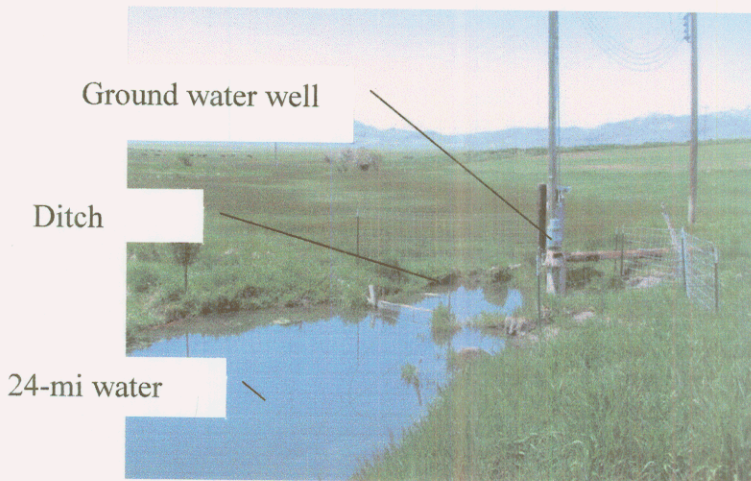

Photo 1. Looking west.

Photo 2. Looking west.

June 7, 2002 Steve Hebdon and I were out measuring some surface water rights on twenty-four mile creek when we visited William Jean Treasure's well.

In the fall of 2001 I made two different appointments with William Jean Treasure and Mr. Treasure canceled each one later. December 21, 2001 Mr. Treasure admitted to me that he cancelled the appointment because he was illegally injecting twenty-four mile water into the well because they don't get enough water from the well to irrigate with.

The power pole in the background of photo 1 is Craig Crandall's property. The water around the well is 24-mile water. It comes into this pond area and then can continue to Craig's property.

Photo 2 was taken looking in a westerly direction.

The licensing examination was done in August of 1974 and noted a 30 hp General Electric pump that appears to still be there. The manufactures plate is worn off that I couldn't verify that it is the same pump.

Photo 3 below shows the pond completely surrounding the pump casing. About 3 inches from the surface of the pond the pipe is perforated to allow the 24-mile creek to flow into the ground water. By adding the surface water to the well they can use the pump.

Photo 3. Looking southwesterly.

The mainline goes north to property in the NESW quarter of section 33, township 6 south, range 39 east.

The 1987 NAPP photography doesn't show irrigation in the W1/2NW of section 33 which was decreed and licensed under these rights.
