Subject: RE: possible notice of violation needed

Hi Cindy,

I called and spoke to Loren Smith this morning concerning the complaint. He admitted that they did as you had explained but that it was temporary since the Portneuf and other springs on the grazing ground were dry. I indicated to him that it was not legal to do the diversion that he did but that there were options for temporary transfers due to drought conditions. I also asked him whether he had stock water rights from the Portneuf. He said no. Perhaps he should have filed on some. In any event, I requested that he consult with us prior to attempting anything like this in the future. wrw.

Subject: possible notice of violation needed

good morning,

I received a complaint from a water user in Chesterfield that Dean Smith was pumping water from this irrigation well into a ditch that dumped the water into the Portneuf River to convey it down stream to his cows. He started in Mid-to-late September until at lease November 4th. He is not currently pumping from the well.

Claim No. 29-2545. You might want to at least send him a notice of violation so it can be documented.
