I think proceeding as you have outlined is fine. Thanks for the help and good luck. I know Paul and am sure he will carry forward. Please send the revised claims directly to Glen Bollingbroke for his signature and return with a copy to me. That will expedite matters.

Thanks and good luck!
Randy Budge

Subject: Bolingbroke

Thanks for getting back with me. Besides the go-ahead on amended claims, I was hoping for maps from you. Since your maps apparently are about the same as mine, and since apparently Mr. Bolingbroke's holdings haven't changed since the license was issued to his father, I propose sending amended claims that match the place of use of the ground water license, with the decreed Rattlesnake Creek water and the beneficial use claim from the spring amended to a Permissible Place of Use basis.

The other thing I propose is to amend the ground water license to reflect the storage in the pond, and sending a new beneficial use claim for storage of surface water in the pond.

I'll be in the office again Tuesday, if this sounds like an acceptable plan let me know and I'll crank out the amended claims and the new claim.

You see I've cc'd this to Paul Meyer. I'm leaving the dept, Paul has years of experience and will be taking over the claims I was working on. You can reach him at the same phone number, he and I have reviewed Mr. Bolingbroke's situation.
