

MEMORANDUM

From: Jennifer Dean JD
To: 2-2175E Claim File
Re: Irrigated Acres
Date: February 24, 2006

In a meeting with John Marshall and a representative of Allan Nobel Farms, the irrigated acres for this claim were discussed. The claimant desired to pick up acres in Section 24 NESE and SESE. These acres were previously unclaimed by anyone. Don Shaff agreed that we could modify the shape/POU to pick up these acres. The exchange would be for acres in Section 23 NWSW and SESW. This would retain the same number of acres for the recommendation.

In the process of redrawing the shapes to reflect these changes, I discovered that the GIS shapes were already quite generous (34 extra acres mapped). In order to rectify this the shape and the recommendation were modified to remove roads that cut through the property. By doing this, the shape was reduced to match the number of recommended acres. This represents a change to the license as well; therefore, the recommendation contains condition C05 to reflect the accomplished change in POU.
