E. **REASONS SUPPORTING OBJECTIONS(S):** SRBA has recommended our water diversion rate be reduced from 3.2 CFS to 1.8 CFS. Our irrigation system is designed for the higher flow rate. We flood irrigate and need the larger volume to do it efficiently. In addition, our pump does not have the turndown capabilities. Any reduction in diversion rate would be very costly and detrimental in our ability to effectively irrigate. I strongly object to the SRBA proposed reduction in diversion rate and it is important that it is denied.
