Larry,

We can try the SF5 route and hopefully he'll respond by sending it back.

Candice

Subject: 29-04083; Claimant: Bingham

I have tried to call this claimant starting on January 21, twice a week through February 10, to no avail. He has no machine for phone messages. Casey has been trying to call since the middle of February, to no avail. Casey confirmed that Bingham still owns the property.

The POD for the claim is located on BLM and is a typographical error because there is no water source at the legal description in the director's report, and the POD, as claimed, is T10S, R32E, Section 35, NWSENE. See Amended Notice of Claim to a Water Right Acquired Under State Law. BLM confirmed that this is the correct POD by GPS.

Candice, we would like to get this one resolved without need for a hearing. Would it be possible for IDWR to issue an amended director's report based upon the Amended Notice of Claim? In the alternative, would you be willing to provide us with an SF-5 that changes the POD to T10S, R32E, Section 35, NWSENE so that we can mail it Bingham with the hope that he will read his mail, sign the form, and send it back for filing?

Casey: Phone calls appear to be fruitless, so you may cease calling.
