Subject: Re: White water right claims

Dear Roger Warner,

After recieving your latest E-mail dated April 18, 2003, regarding water right claims 29-4095, and 29-4096, I feel we have put together a satisfactory water right claim package. I think these claims will now reflect my Mothers stake in Idaho's water recources. Thank you for your guidance in this endeavor.

I was curious about the best way to determine quantity in cubic feet per second. How do you calculate quantities given a certain pipe diameter and the other variables involved? When you have time perhaps you could forward this type of information?

Again Thank You for your patient and prompt feedback.

Sincerely,
Richard N. White
