E. REASONS SUPPORTING OBJECTION(S):

The State of Idaho, Department of Parks and Recreation, (hereinafter "IDP&R"), began acquiring the lands that are part of Malad Gorge State Park in about 1970. The total acreage of the Malad Gorge State Park is about 650 acres. Most of the land that was arable had been farmed prior to the acquisition by IDP&R. The total irrigated acreage in 1969 was in excess of two hundred and twenty acres. After this acquisition, the IDP&R has converted some of the irrigated farmland into irrigated parkland. The IDP&R has converted other parts of the irrigated farmland into native grasslands that continue to be irrigated. Native grass seed is harvested from the native grasslands. In addition, the IDP&R continues to graze these native grasslands under contract with adjacent landowners.

The Justice Ditch Company is an unincorporated association of the users from the Justice Ditch. The Justice Ditch provides water to the Malad Gorge State Park. The recommendation by the Idaho Department of Water Resources deleted all lands within Malad Gorge State Park from the authorized place of use for the Justice Ditch.

A diversion in excess of the standard 0.02 c.f.s per acre is needed to deliver the water diverted to the designated place of use. The appropriation described in notice of claim 37-4091 had provided some of this carriage water in the past. In the event that the recommendation of the Idaho Department of Water Resources is sustained by the district court to disallow notice of claim no. 37-4091, then some additional water needs to be added to the quantity term for this water right to provide this carriage water.
