E. REASON SUPPORTING OBJECTIONS(S)

3. Quantity

The Idaho Department of Water Resources has adopted a policy that groundwater rights are to defined on a volumetric basis, as opposed to the rate of diversion and length of irrigation season, and has applied this policy in the adjudication of groundwater rights. To be consistent with this policy, and other groundwater rights being recommended in Basin 27, it is necessary that this water right explicitly define a volumetric diversion limit.

9. Place of Use

The Partial Final Consent Decree Determining the Rights of the Shoshone-Bannock Tribes to the Use of Water in the Upper Snake River Basin (August 2, 1995) decreed all water rights to Indian lands within the exterior boundaries of the Fort Hall Reservation as reserved to the Shoshone-Bannock Tribes. All or a portion of the land served in the place of use for this recommended water right is located within the boundaries of the Fort Hall Reservation, as surveyed by the U.S. Bureau of Land Management, and thus is located on Indian land. This recommendation seeks a water right for land that has already been decreed to the Shoshone-Bannock Tribes. To the extent that the recommended total acreage and water quantity includes Indian lands, the water right should be modified by deducting the decreed Indian land and corresponding water quantity.
