### **E. REASON SUPPORTING OBJECTIONS(S)**

#### **3. Quantity**

The Idaho Department of Water Resources Director's Report recommends a total annual diversion volume for some, but not all, water rights in Basin 27. This recommended water right has no volumetric diversion limit defined. In 1995, the water rights of the Shoshone-Bannock Tribes in the Blackfoot River Basin were quantified on a volumetric basis. Pursuant to the 1995 Partial Final Consent Decree Determining the Rights of the Shoshone-Bannock Tribes to the Use of Water in the Upper Snake River Basin (August 2, 1995), all water rights in the Blackfoot River system (Basin 27) are to be quantified on a volumetric basis as opposed to the rate of diversion and length of irrigation season. In water right No. 27-11375, the Shoshone-Bannock Tribes and United States agreed to subordinate the exercise of their surface water rights in the Blackfoot River to those water users diverting water prior to January 1, 1990. This subordination was based upon an estimate that the total annual diversion volume of these non-Indian water rights would not exceed 45,000 acre-feet per year. Therefore, in order to comply with the 1995 Partial Consent Decree of this Court, it is necessary that all water right decrees issued by the Court in Basin 27 include a total annual diversion volume limit measured in acre-feet per year.

#### **8. Period of Year**

The water rights of the Shoshone-Bannock Tribes were quantified in the 1995 Partial Final Consent Decree Determining the Rights of the Shoshone-Bannock Tribes to the Use of Water in the Upper Snake River Basin (August 2, 1995). In water right No. 27-11375, the Shoshone-Bannock Tribes and United States agreed to subordinate the exercise of their water rights in the Blackfoot River to those water users diverting water prior to January 1, 1990. This subordination was based upon an estimate that the total annual diversion volume of these non-Indian water rights would not exceed 45,000 acre-feet per year. It was understood by the parties to the negotiation that diversions in the upper elevations of Basin 27 are limited by the availability of runoff, which lasts to July 1 of each year. The source of water serving this water right is not available for use past July 1. The period of use should be revised to match the period of water availability, and as such should terminate on July 1
