 - ☐ This water right was not recommended, but Should be recommended with the elements described above.

E. **REASONS SUPPORTING OBJECTIONS(S):** SRBA recommends a reduction in total acreage from 133.3 acres to 94.1 acres. This recommendation is based on forfeiture for non-use. It's true that attempts to irrigate the additional acreage were unsuccessful for over five years. I did not have the means to install a proper system and was unaware of the potential for loss of use. I have filed for an extension of forfeiture with IDWR. I have recently been made aware of NRCS cost sharing programs. It may prove to be too costly but I would greatly appreciate the opportunity to explore options for installation of a new irrigation system for the entire 133 acres by using the same amount of water more efficiently and within the parameters of the existing license.
