RE: beneficial use claim

DATE: February 1, 2002

NAME OF PARTY

Ada Marie and Adam Mabey

Office visit

Ada Marie and her son Adam came into the office to discuss her adjudication claims. The irrigated acres claimed under this right have been in CRP since September of 1986. The pond is also used for range cattle and sheep in the NWNE and the NW1/4 of section 33, township 7 south, range 40 east. They have stock there year round. The source is springs that sink, not Mabey Canyon.

We also discussed that Ada Marie's daughter has developed the spring for a domestic source and hasn't filed on it in the SRBA. I suggested she file on the spring for domestic purposes. Also Adam explained that they have a back up domestic/stock watering well. I explained that they didn't need to file on it in adjudication but they might want to think out it. So, they were going to gather some information and get back with me.

Adam's phone number is 648-7700.
