Re; Final recommendations; 29-04302, 29-11463, 29-11465

Dear Lynn;

This is the final cut on the recommendations and represents what I intend to forward on to the court.

I do need to point out a couple things; First, the acreage has been reduced from 323.2 to 313.0. This is because there were some areas included in the legal description that are not a part of your holdings. I have attached a copy of the page (29-11465) showing the Place of Use descriptions that are in error (circled) and deleted; annotated with ownership (hand-written). Then, because of the foregoing, the cfs was reduced accordingly on 29-04302 (only). And, while the CFS is reduced it still represents 0.02cfs/ac, maximum allowed by §42-202 and §42-220 IC.

I enclose copies of the original survey plats that illustrate the layout of the sections (30 and 31), within T10S, R37E. You can compare these to the GIS illustration while noting the discussion of the Lots with numbers vs the Quarter-Quarter/Lot number designations.

I apologize for the confusion and appreciate your understanding. I have enjoyed working with you to accurately represent your water right claims as final recommendations. If you have questions please contact me.

Respectfully submitted,

Allen Ruberry
Sr. Water Resource Agent
Adjudications Bureau
