Hey there Cindy,

Ralph Wheatley has apparently purchased a number of the water rights previously owned by Yost and Modersitzki (I haven't checked for ownership change forms, but Wheatley's attorney says they have been filed). Mr. Wheatley is now applying to put the rights he owns into the water supply bank.

Though entering a right into the bank is fairly straight forward, we do like to have some indication that it is a valid water right. In this case, since no review has been done on the claim and it is based on beneficial use, I will probably recommend that it not be accepted into the bank.

Thanks for the help, and have a good weekend (I am looking ahead...).

Cynthia

hi Cynthia,

I'm just now getting basin 27 claims. This is a ground water right owned by Phil Yost or David Modersitzki. I haven't had a chance to verify anything yet. What are they requesting to put into the water bank?

Cindy

Subject: Checking on a claim

Hello Cindy,

I hope everything is going well out there in Soda Springs. I wanted to check on the status of Claim 27-11314. I have an application to rent the right to the Water Supply Bank, but it is based on Beneficial Use so we would like some verification that it is a valid right. We will consider accepting the right to the bank if the SRBA has done some review of it already that suggests it is valid, but if we have no information at this time, we will simply deny the application.

Thanks for your help,
Cynthia
