Ernie,

My duties for aerial photography seem to be assisting the regions in ordering larger quantities of photographs where we've ordered indexes for selecting photos to purchase, and seeing them through the scanning and registration process. I haven't been involved when there are a small number of photos ordered, but can help a bit. It sounds like Cindy's area is small enough that one or two photos should do the trick.

I see that the APFO in SLC has partial coverage of Caribou county from 1964 (see <http://www.apfo.usda.gov/filmcatalogs/id.pdf>) They may or may not have photos for Cindy's location. I suggest Cindy contact the APFO directly with the legal location (see the web site; their number is included), and they can tell her if there is any coverage for that year at this location. If so, she can work with them to identify exactly which photo(s) are needed for coverage. Sometimes it helps to provide a map to them using our aerial photography or the DOQQs that is large enough scale to show roads and streams. Single photos are something like \$5 each for 9x9 BW print. Once you have the photo(s) identified, I can carry the order on, or you can handle it as you prefer.

If APFO doesn't have coverage, there are a few other potential sources that are generally a little more expensive and more time consuming to research. Check with APFO first, and let me know if you're not successful.

Scott

Scott, are you the contact person for ordering early imagery?
Ernie

hi,

Is it possible to order some 1962-4 imagery for basin 27 on some of these B.U. claims? Specifically, T5S, R40E sections 22, 23 and 26. I have several filed in this area from different sources that don't quite jive with the information in the file.

Thanks,
Cindy

5/13/03 27-4009.

The FSA map dated 11/74 does not show the land in Section 22 as irrigated, the land in Section 26 however was.

Email message attached from Scott King about the early imagery.
