SALMON RIVER CANAL COMPANY, L.T.D.
RT 1 BOX 4457
TWIN FALLS, ID 83301

DEAR SIRs:

ENCLOSED PLEASE FIND THE ADJUDICATION CLAIMS AND CHECK
YOU SUBMITTED TO OUR OFFICE. THANK YOU FOR YOUR TIMELY
RESPONSE.

BOTH SINGLE DOMESTIC CLAIMS ARE FINE. THE MULTIPLE FAMILY
DOMESTIC/COMMERCIAL CLAIM WAS BASED ON LICENSE #47-7373
AND NEEDED A LONG FORM COMPLETED RATHER THAN THE SHORT
DOMESTIC FORM. WE HAVE ENCLOSED A COMPUTER GENERATED FORM
FOR YOUR CONVENIENCE. ALL WE NEED IS YOUR SIGNATURE
ON THE FORM AND NOTARIZATION. THE CLAIM REPRESENTS 5
HOMES WHICH MAKE IT A MULTIPLE FAMILY DOMESTIC CLAIM,
AS WELL AS A OFFICE AND SHOP, WHICH ARE USED FOR
COMMERCIAL PURPOSES. THE FEE FOR THE CLAIM IS \$50
PLUS \$100 PER CFS. THE CLAIM WAS ORIGINALLY LICENSED
FOR .12 CFS, WHICH MAKES THE CLAIM \$62 RATHER THAN
\$25.

PLEASE RETURN THE SIGNED AND NOTARIZED COMPUTER CLAIM
AND THE OTHER 2 DOMESTIC CLAIMS WITH A NEW CHECK FOR
THE CORRECT AMOUNT OF \$112.00.

THANK YOU FOR YOUR CAREFUL ATTENTION CONCERNING YOUR
WATER RIGHT FILINGS. PLEASE FEEL FREE TO CONTACT OUR
OFFICE IF YOU HAVE ANY QUESTIONS OR IF YOU NEED
ASSISTANCE.

SINCERELY,

LORI WHITE
WATER AGENT

HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

10. Place of use is: Township 11S Range 16E

MAR 16 1993

It is very important that you inform the department in writing of any change in your address. This is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

If you are acquiring property with water rights in the Snake River Basin water system in Idaho (either by purchase, gift, inheritance, or other means), it is very important that you inquire of the department whether a notice of claim has been filed. If not, you must file a notice of claim or the water right may be declared by the court to no longer exist. If a notice of claim has been filed, it is very important that you file a written notice of change in ownership with the department. The notice of change in ownership must be accompanied by some evidence of the change in ownership, such as a copy of the deed for a property interest, showing the name of the new owner. Again, it is important that you receive notices that are affecting your water rights that are to be mailed by the department.

The cost of the subscription to the department is \$7.50 for calendar year 1988. The cost of the subscription may increase a small amount for calendar year 1989 if the cost of copying and/or mailing should increase.

If you are planning to file a motion or other pleading (not a notice of claim) with the court (not IDWR), the court has issued an order setting a special procedure that is different from the usual civil rules. A copy of the order may be obtained from any office of IDWR; you may be charged for the cost of mailing and/or copying.

59446

AMOUNT \$

YES

NO

1. Is the name and address complete with zip code?

2. Is a priority date entered?

Is the water use exempt from the Permit requirements, or if it is not exempt, has a Permit been approved or a License issued?

A Permit is required: (1) for groundwater developed after March 25, 1963 (except single family domestic and stockwater wells using less than 13,000 gpd), or (2) for surface water developed after May 20, 1971 (except for instream stockwater). USE CARE IF CLAIM IS RETURNED. REFER TO ADJUDICATION MEMOS # 1 (ADJ. CLAIMS/APPLICATIONS) AND # 9 (REJECTION OF CLAIMS). EXPLAIN IN COMMENTS.

3. (a) Is a source entered?

(b) Is a tributary to entered? (if required)

N/A

4. Is the legal description of the p.d. sufficient?

5. Is there a description of the diverting works?

6. Are the water uses appropriate for the form? The short form is limited to domestic and stockwater uses with direct diversion. All claims that include storage or instream stockwater must use long form.

Is the period of use included?

Is a quantity claimed for each use?

7. Is a total quantity claimed entered?

8. If required is a consumptive use entered?

N/A

Is the consumptive use correct?

N/A

9. Are the non-irrigation uses listed properly? If this claim is on the short form, and more than one domestic use is listed, single ownership must be stated. If not under single ownership, each household must file a separate claim. See Adjudication Memo # 4.

10. Is (are) the place(s) of use entered?

11. Is (are) the county(ies) entered?

12. Is the ownership of p.u. checked?

13. Are other water rights listed or "none" checked?

14. If required, are remarks correct? (If the claimant does not own the place of use, authority for filing the claim must be explained in the remarks.)

N/A

15. Is the basis of the claim checked?

16. Is the claim signed by the claimant, and is the signature appropriate? (If an individual is the claimant, has that individual signed the claim, or if an organization is the claimant, is the organization signature block complete?)

Has the claim been signed, sealed, and dated by a notary?

Is the fee enclosed correct?

If this claim is based on an existing water right, has the identification number been entered?

N/A

Should this claim be receipted and data entered?

Claim checked by:

JCC

FOREWORD

The following report was prepared during the summer of 1968 by Mikel H. Williams, a senior law student at the University of Idaho. Mr. Williams was hired by the Department of Reclamation to research the files and records of the Department and federal and state laws and to prepare a summary of the past history of development and the current status of the Carey Act.

The Department gratefully acknowledges the assistance of many individuals throughout Idaho and other states who spent time providing him with information and historical background material. The outline of the history of each Idaho Carey Act project was prepared by Mr. Williams and the Department solicits comments from any interested party concerning the accuracy or completeness of any detail.

The primary purpose of the study was to provide the Department with information in connection with its responsibility for the "... selection, management and disposal of said land. . ." However, it was felt that the report was of sufficient interest that it should be reproduced and made available to the public.

R. Keith Higginson
State Reclamation Engineer

prospect of water the project ground to a halt. Damage claims for short water deliveries aggregating over \$200,000.00 were soon instigated by water users.

It was at this point that the man credited with saving the project appeared, R. E. Sheppard, who soon became manager of the project. Through consolidation of the land area and through cooperation of all parties involved, work soon resumed on the project. The federal government agreed to commence construction on Wyoming project. By 1921, 125,500 acres were in cultivation including 10,100 acres reclaimed by the Milner Pumping Project that had been started by the Twin Falls North Side Project. A court decision, Twin Falls Canal Company v. Chas. N. Foster, set the water supply for the project and as a result of this a contract was reached between the construction company, the state, and the settlers, whereby they agreed to limit the project to 185,000 acres.

At the completion of the project 100 miles of main canal had been constructed and 800 miles of laterals. In 1920 the works were turned over to the operating company, the North Side Canal Company.

Twin Falls Salmon River Project

Many of the problems that affected the Twin Falls North Side Project also hampered the development of the Twin Falls Salmon River Project, such as the failures of the eastern financial institutions that were backing all of the Kuhn interests. Even with this, the project has always had its own unique problem, lack of water.

The original proposal placed the estimated cost of construction at \$3,000,000.00. The contract entered into between the construction company, the Twin Falls Salmon River Land and Water Company, and the state, planned on irrigating 127,707.29 acres previously segregated for the project. The water supply for the project had been estimated by one of the promoters. He estimated the runoff of the Salmon River drainage at 400,000 acre feet per year, studies currently conducted by the Department of the Interior place the runoff at closer to 96,000 acre feet at the end of the Salmon Creek drainage in Nevada. (86)

To divert water for the project a concrete dam was constructed on Salmon Creek. After the dam was constructed the tremendous water shortage became evident. From this time on the problems in the Twin Falls Salmon River Project can be traced to efforts to reduce the original acreage to an amount equal to the available water supply. Through numerous cuts, orders from the State Land Board, refusals of patents, and court decrees; the acreage was finally reduced to around 35,000 acres. In 1924 the settlers took over operation of the project through their operating company, the Salmon River Canal Company.

The reduction of the area of the project was a great hardship to many of the entrymen outside of the retained area. It led to the passage of House Bill 246, Session Law 1921, that granted refunds to settlers for money expended on fees and for acreage. The Smith Act, United States Code §§ 644, was passed in 1920 giving preference rights to settlers excluded from a project

in order that they might perfect their entry under other federal land laws.

Twin Falls Oakley Project

In order to better understand the developments on the Oakley extension of Kuhn plan, a summary of the early history is presented.

The first settlements on Goose Creek, from which the Oakley Project received its water supply, were made in the early 1870's by three families at the crossing of the old Oregon Trail, some eight or ten miles south of the present town of Burley and twelve or fifteen miles north of the present town of Oakley. Later, Mormon settlers from the vicinity of Grantsville, Utah, settled around the present town of Oakley in 1879. Water was immediately taken from the mouth of Goose Creek and even at this time a water shortage appeared in the making.

This was the situation when the Kuhn interests appeared in the area and started conducting surveys as to the feasibility of reclaiming land under the Carey Act. A construction company was formed, the Twin Falls-Oakley Land and Water Company, and a proposal was filed with the State Land Board. Information as to the annual runoff was lacking so the promoters relied heavily on the representations of the older settlers as to the amount of water available for the project and in turn the State Land Board relied heavily on the representations of the various promoters.

Early in the stages of the project the company realized it needed all the water it could obtain. With this objective in mind they entered into agreements with the older settlers whereby they released their water rights in turn for new water contracts with the company.

The Kuhn interests proceeded with the construction of the necessary irrigation works to reclaim the 43,893.56 acres they had segregated for the project. When the dam on Goose Creek was completed it was the largest earth dam in the world.

In 1913 the American Water works and Guarantee Company, which had financed the \$1,467,000.00 bonds still outstanding, failed, forcing the Twin Falls-Oakley Land Water Company into the hands of a receiver. A committee of bondholders was formed to protect their interest and water contracts were required to be filed as security. The committee of bondholders also took over the construction company.

Many of the problems in the Oakley area paralleled the Salmon River Project. By 1919 various attempts had been made or were in the process of being made to reduce the acreage of the original segregation. There was a major reduction of entrymen in 1919 for failure to make proof. Litigation developed and continued until 1931 over the reduction of area. The area in the project was finally condensed into a compact unit, cutting heavy transportation losses. Much of this occurred after the settlers assumed control of the project in 1916 through their operating company, the Oakley Canal Company. Water was eventually found to be adequate for about 21,000 acres, a far cry from the original 50,000 acres planned by the various promoters.
