To whom it may concern:

My husband was Glen G. Morrison, born & raised on ranch where Water Rights are being questioned. We were married in 1944. He was using the reservoir to irrigate Hay ground at that time, & continued to use it until he sold ranch to Egans - in 1972. He said the CCC Corp. constructed said Reservoir in the "30's". Obviously the water right was part & parcel of this ranch from the beginning. I trust this information will help clear up any questions on ranch water rights.

Sincerely,

Josephine Morrison Smith

To whom It may Concern -

My father Jaesph George Morrison
owned the property below the reservoir
on Patter Creek.

He used the water to irrigate the
land for more than 65 yrs. to my
knowledge.

Dorothy Morrison Madsen

STATE OF UTAH
COUNTY OF WASHINGTON

On this 23rd day of July, 2002, personally appeared before
me Dorothy Morrison Madsen who is personally known to me, or
(proved their identity using satisfactory evidence), and
acknowledged to me that she signed the above instrument for
its stated purpose.

To Whom it May Concern:

I am writing to give you my knowledge of the use of Potter Creek in South Bannock County. I bought the Morrison place from Bob Morrison in 1971. Potter Creek was stored in a reservoir above the farm and was used to supplement water pumped from Marsh Creek. The Marsh Creek pump was shared by Glade Davis, Wm. D. Fuhrman and myself (D.F.&M. Pump). I would store the Potter Creek water until my water turn and then I would open the reservoir to supplement the stream. To the best of my knowledge that was the way the water was used after the D.F.&M. Pump was installed in Marsh Creek. In the early 1980's, we (Davis, Fuhrman, and Egan) each installed sprinkling systems and the shared pump was abandoned. With the installation of the sprinkling system, Potter Creek water was then used, and has continued to be used, to water the pasture land east of the road. To the best of my knowledge Potter Creek has been used to irrigate the place I own (formerly the Morrison Place) since the land was broken out of sagebrush, prior to 1900. The canyon is steep until it reaches the area of the farm below the reservoir, making it impossible to use for anything other than livestock above that point.

Sincerely,

William A. Egan

To Whom it may Concern:

My Father, Joseph George Morrison, at one time
owned the Property below the Reservoir (Patterson Creek).
He used the water from this reservoir to
irrigate the land below the reservoir.

As far as my recollection, the water from
the reservoir has been used since at least 1936.

Re: Historic use of Reservoir on Potter Creek.

Dear Mr. Egan,

I was raised on the farm that controlled and used the reservoir on Potter Creek during my teenage years in the late 1960's. (See attached U.S. Geological Topographical map) I helped my father irrigate cropland in the NW1/4SE1/4, and NE1/4SW1/4 of Section 11 with the water that was stored in that reservoir. My father sold this farmland to Bill Egan in 1971.

Potter Creek would run into the reservoir, and we would store the water until the reservoir was full, and then my father or I, would open the head gate and irrigate with a larger stream of water for about 2 days until the reservoir was drained. The reservoir would refill over the next 5 days. The length of time to fill the reservoir depended on the time of year and runoff in the creek.

During the non-irrigation season the reservoir remained full and water would run over a rock-lined spillway to the creek channel and we would use this water to irrigate pastureland and water livestock.

The sediment in the reservoir was dredged out several times by Dan Jensen, a local construction operator, from Downey with his cat and dragline.

This reservoir was exclusively used and controlled by our family in connection with our farm for as long as I can remember.

I hope this helps clarify the historical use of this reservoir.

Yours truly,

Robert G. Morrison
