To Water Resources:

To the best of my Recollection, the property known as Chesterfield Ward was donated by Homer Cooper and was irrigated out of Nipper (1902) water. The Church drilled a well in approximately 1953. The Church's yard, playground, and Ball Park were irrigated from this well. In 1996 the Church building was enlarged covering the old well, so a new well was drilled just east of the building which waters the same ground.

Signed: *Thelma Redford*
(BD. Apr. 18, 1914)

Thelma Redfern was the Bishop's wife at the time of the Chesterfield Ward Building Construction.

Dear Water Resource .

To the best of my knowledge Homer Cooper
donated 5 Acres to the Church of Jesus
Christ of Latter Day Saints & watered
the 5 Acres.

By A. Lee Crockett
Bancroft Idaho

P.S. The Church drilled a well in 1953
And irrigated the 5 acres for a Ball field
& Play area. 1996 the Church enlarged
the Building - the well had to be covered
& a New Well drilled - but No more
land was covered.
