Myrna Schram being first duly sworn,

deposes and says: I certify that my husband Rudolph and I purchased the North
half of the South half of the Northeast quarter of the Southwest quarter of Section
4, Township Ten, Range 5, West of the Boise Meridian, in 1959 and took possession
in July of that year. At that time, there was an irrigation well located near
the South boundary. That well, the one I am filing on, has never failed to
produce sufficient water to irrigate the farm land of 9 acres, more or less and
has been used each year. The land has continuously been in crop and irrigated
as dictated by our hot summer weather. Even in drouth years of 1966, 1977, and the
late 80's thru the early nineties and again during our last 6 years of drouth,
this well has produced sufficient water to raise crops of hay, grain, row crop
and pasture. Because of a failing house well, it has also watered two yards,
flowers, fruit trees, shade trees, berries, and grapes, taking in 9.5 acres.
Until 1973, this well also irrigated the 1 acre, more or less, where my present
home sits. As an employee of USDA, in the ASCS office from 1968 thru 1997, and to
present crop reports were filed. This place has grain allotments, but no crop reports
go back to 1959 on record.
