I spoke to Mr. Sanders and Mayor Wilde on the phone on 8-3-94. According to Mr. Wilde, Mud Lake Township has not kept pumping records over time. He instructed Mr. Sanders to determine pumping amounts for this summer.

Mr. Sanders checked the in-line meter for 12 days in July and told me that the lowest 24 hr. rate was 233,000 gal. and the highest was 385,000 gal. Mr. Sanders and Mr. Wilde agreed that an average of those two would adequately represent summer needs for the township. A similar process will occur in January 1995 to determine winter needs. Annual Volume for Mud Lake
from city's in-line meter as
described in CVR:

$$\begin{array}{r} 385,000 \text{ gal per day} \\ + 233,000 \text{ gal per day} \\ \hline 618,000 \text{ gal per day} \end{array} \quad \text{In July}$$

$$\underline{\text{CVR}} = \underline{309,000 \text{ gal per day}}$$

$$\begin{aligned} & 309,000 \frac{\text{g}}{\text{day}} (365 \text{ days}) \left(\frac{1 \text{ AF}}{325,850 \text{ g}} \right) \\ & = \underline{346 \text{ AFA}} \end{aligned}$$

$$\text{Well \#1} = 1 \text{ AF} = 730 \text{ AFA}$$

$$\text{Well \#2} = 2.25 \text{ cfs} = 1642.5 \text{ AFA}$$

$$\text{total} \quad \underline{2372.5 \text{ AFA}}$$

346 AFA seems reasonable

Re: Snake River Basin Adjudication (SRBA)
Jefferson County - Claim No(s): A31-07146

Dear Mayor Wilde,

I am currently reviewing the claims filed by the City of Mud Lake in the Snake River Basin Adjudication. In order to prepare accurate descriptions of the city's water rights for inclusion in our report to the Court, we need additional information about the city's water delivery system.

First, I need a copy of the most up-to-date map of the city limits. The map should also show details of the city's water delivery system. Please show the locations of all of the city's wells, major pipelines, storage tanks, etc. Also, please show any wells that are no longer in use and indicate whether their use is permanently or temporarily discontinued.

Secondly, I need to know if your municipal water system delivers to any users outside the city limits. If so, please indicate the number and location of any homes, the number and location of irrigated acres, the type and location of any commercial or industrial uses, etc.

Lastly, I need information that can be used to calculate a consumptive use component for the city's water rights. ("Consumptive use" is the amount of water permanently lost from the hydrologic system due to evaporation, etc.) For this calculation, I need records of the monthly diversion volumes for the entire system. With this information, we can compare winter pumping volumes to summer pumping volumes to determine the amount of water used for irrigation, hence the amount lost through evapotranspiration. In addition, are there any commercial or industrial uses, supplied by the city, that may lose substantial amounts of water due to evaporation?

I would like to have this information within the next 30 days. I realize that this is a huge task; please realize that I am willing to work with you to find simple, efficient methods for getting the data we need. I can be reached in Boise at (208)327-7925.

Sincerely,
