E. **REASONS SUPPORTING OBJECTION(S):**

- 1) In the "Quantity" section of the recommendation for this right, the 22.4 afy volume provision should be clarified to apply only to the "Irrigation" and "Aesthetic Storage" purposes listed under the "Purpose and Period of Use" section of the recommendation. Similarly, the combined annual volume of

28.1 af in the seconded sentence under the "Quantity" section should be clarified to apply only to "Irrigation" and "Aesthetic Storage" purposes. Diversion and use of water for the purpose listed as "Aesthetic" under the "Purpose and Period of Use" section of the recommendation for this right should not be subject to these annual volume limits, in accordance with the development and use of the right and as licensed by IDWR. Water in addition to that required for irrigation and to fill the pond has always been diverted to flow through the pond to maintain the quality of water in the pond.

- 2) The 21.6 af volume for irrigation in the first sentence under the "Quantity" section in the recommendation for this right is a clerical error. The numbers have been transposed from 26.1 af licensed under Right No. 63-10818.
- 3) Paragraphs related to conditions of approval from Transfer No. 71237 that are no longer applicable should be dropped from the "Other Provisions Necessary for Definition or Administration of this Water Right" and the "Explanatory Material" sections of the recommendation for this right; i.e. Paragraph 2 under "Other Provisions..." section and Paragraphs 3 and 5 under "Explanatory Materials" section should be deleted from the recommendation for this right. The new well for the change in point of diversion approved by the transfer has been constructed and the old well has been abandoned. Drillers' reports have been filed with IDWR documenting compliance.
