Re: Well Interference

When I did the Adjudication field exams for Mr. Barry Williams, he took me to two wells which he alleges are interfering with the flow of Bannock Creek. He called again today, and I also have received e-mail from Shoshone-Bannock Tribal Water Engineer Elese Teton asking about these wells.

The attached letter is my response to Mr. Williams.

Mr. Williams says the original licensed PD for this right was not a problem but that well is not used any more. Apparently this right has had an accomplished transfer about 1 mile east to the same PD as permit 29-7931A, which is a problem Mr. Williams says. Note that PD is claimed as licensed.

 BAC 9/12/01
AC000217 IS CLAIMED WELL - PRM 10/26/01

AC000218 IS ACTUAL P/D
