Water Resource Board —

July 27, 2003

RECEIVED

JUL 30 2003

Department of Water Resources

Response letter
to DWRB.

Dear Sir:

The Idaho Dept of Water Resource
Recommended a water right
as follows

.910 CFS

1.750 CFS. Garden Creek water.

1.750 was decreed to my farm.
However in the 60 years that
I have lived here water has
never been delivered by the
Garden Creek Irrigation Co. Most
of the time they don't have
any water. Therefore I would
like to obtain the sum of
the water rights. (2.66 CFS) from
my will. I have proven prev. use
far more than .910 CFS.

29-00395 + 2900396.

The decree should remain — but

until the water can be delivered
by Garden Creek Irr. Co the
water right is useless. —

Sincerely
Grant H. Olson
