OBJECTIONS

BASIN 21

PLACE OF USE

In this area we use one irrigation system to pool several water sources together for more practical use. I originally filed separate places of use for each source. The adjudication agent chose to use a combined place of use for these rights in the preliminary recommendation, but the correct acreage based on all the rights was not properly calculated and the attached map was in error. In the notice of errors I accepted the combined place of use method and provided what I felt was the proper acreage. The adjudication agent used a map depicting the acreage I described and came up with a new combined place of use and total acreage figure. The adjudication agent did an excellent job and caught several errors I had made. The agent included two parcels of state land that are not claimed in this filing and should be excluded. Their description and acreage is as follows: T13 R40E S12 SWNW .20 acres and S15 SENE .10 acres. This land should be excluded from the place of use and this will change the total acres from 669.2 to **668.9**. All the other descriptions are correct. The total acreage should also be changed in the text following the place of use descriptions that places limitations on the use of this water right.

Other Provisions

I hold contracts for storage water that total 60 AF in Island Park Reservoir and 190 AF in Palisades Reservoir. To the extent there has been water master control of my Basin 21 rights in the past, my out-of-priority diversions from Morrain Springs, which is a tributary to Sheridan Creek, have been offset by releases from the two reservoirs. To preserve this practice in the decrees, I propose the following language for these rights to be added to the "other provisions necessary" portion of the decree: **"Water may be diverted out of priority under this right when an equivalent amount of water is being provided by storage water."** This language would clearly explain to all how and where the storage water may be delivered.
