

3/5/02 Claim 29-7394C

When Dean Gilbert was in my office filing a notice of claim to a water right, he felt that he was irrigating more than 7 acres. So he filed for 9 acres.

When I checked the 1987/88 NAPP Photography in ArcView it showed 6 acres and about 1 acre. So, recommend the 7 acres that remains under this license.

4/24/02 I didn't recommend stock water under this portion of the right because it is fully claimed by Dale Westin in the "A" portion of the right. The stock well is located on Dale's property and I don't think Dale waters Morse's stock from his well. I think it's done from Morse domestic well.
