REASONS SUPPORTING RESPONSES

D. 2, 3, 4 and 7 - Source, Quantity, Priority Date and Purpose of Use:

In its Amended Objection, the City of Pocatello objects to the recommendation in regard to these elements on the basis that it did not include a remark that the water under this right can be stored in various reservoir and tank storage facilities, including water from all other sources available to the City of Pocatello. Respondents are unaware of any basis for the inclusion of such a remark and therefore opposes it as unnecessary to define or administer the water right.

Objector further states that this water right should have been recommended with a general provision that this water right should not be considered junior to water rights from the Portneuf River and should be administered separately from all other water rights in Basin 29, and that said water right should be decreed with the general provision that all of the City's sources of water in Basin 29 should be administered separately from all other water rights in Basin 29. Objector further objects that the recommendation of this right did not include a general provision addressing the Swan Falls rights of Idaho Power Company as set forth in Consolidated Subcase No. 37-02499. Respondents oppose objector's definition of the source of the point of diversion under this right, including the allegation that the right is legally and physically available from ground water sources in Basin 29, and that Swan Falls issues should be addressed in a general provision for the reason that this issue will be addressed in Consolidate Subcase No. 92-37 in the SRBA.

D.5. – Point(s) of Diversion:

Objector, City of Pocatello, alleges that the recommendation for this right should have included 23 points of diversion based upon an "accomplished change in point of diversion." Respondents are unaware of any basis, factual or legal, by which other points of diversion under this right can be included in any decree. Objector further asserts that the points of diversion are interconnected with the points of diversion under other water rights, and that these points of diversion should be interconnected. Respondents object to the addition of points of diversion without a remark or condition recognizing that no well may be used to divert more than the original amount of water authorized to be diverted under an existing right from that well.

D.9 – Place of Use:

The Objection of the City of Pocatello objects to the recommendation of this right for the reason that it does not include a description of the place of use that includes: "including all lands necessary to complete the beneficial use of this municipal water right." Respondent is unaware of any basis for changing the place of use under this surface water right to the vague and undescribed place of use or for including such a remark, and objects to such change.
