Re: Place of use

---

Today I spoke on the phone w/ Mrs. Barkdull. The well irrigated from the well is in front & back of the house south of the angled driveway. More land in front of the house, south of the driveway, is irr. from sprinklers served by 7 shares of Warm Creek Irr.

I explained <sup>to</sup> Mrs. Barkdull that she will have an opportunity to review recommended changes in Notice of Error process.

As long as Warm Creek water is avail. the GW irrigation appears to be less than licensed but I will recommend as licensed because I construe the well as "supplemental" and the land remains in irrigation.

Note that sketch on licensing exam appears to be incorrectly oriented.
