

15 December 2004

Cindy,

I called Michael and asked for something better than the Bingham Metsker map. He suggested the municipality map within spacial. I checked it and couldn't tell that it would tell us anything to clarification the boundary. It needs to be "projected" so that it fits the new layouts. Apparently the last time Michael was here, this was one file that didn't get switched to the new projection.

I prepared a drawing and wrote the claimant asking for confirmation of the service area.
