

29-10048

7/24/01 Met Lamont Ekstrom, Dennis Ekstrom's father.

Lamont completed the change of address for Dennis. He showed me the well location and pump. It is currently inoperative. He further explained that the water temp is now only 105°F whereas historically it had been about 127°F . With this lower temp he cannot operate his hot mineral tubs so the well is down.

Explained the Kintzaid Bns contract under they will need to measure the output and photo the well. Lamont will arrange for that to be done.
