RE: Evidence of Priority 63-28282

Dear Mr. Ciscell,

I received your letter dated April 14, 2006 to request evidence of priority date for water right claim 63-28282. I understand the response deadline is May 19, 2006. I have requested that Steve Hannula of ERO Resources assist me in obtaining the appropriate documentation for that evidence. I understand that he has already telephoned you in the search for aerial photograph evidence.

There are a number of documents that Mr. Hannula and I are currently pursuing to support the water claim. One document is an affidavit from Mr. Rex Evans. Rex Evans is the son of Eb Evans who was the previous owner. Eb Evans has passed away, but Rex recalls many aspects of the ranch from working on it. He recalls that the pond that is part of the irrigation system was excavated for Mr. Rex Jensen, the owner prior to Eb Evans. Layne of Idaho is thought to have put the system together in the 1950's. We are currently pursuing the available information from Layne to verify the construction date.

Also, we have placed orders for historic aerial photographs with the Aerial Photograph Field Office of the FSA. The photos take several weeks to arrive.

Please accept this letter as a request to allow me to submit evidence of priority after the deadline of May 19, 2006.

Thank you.

Regards,

David Vastine
