Subject: Notarized claim 27-11947 and description of property boundaries

Dear Cindy E. Bird,

Please find enclosed the signed/notarized amended claim 27-11947. I have also enclosed a copy of a survey we had done earlier this year. The survey matched closely the actual property boundaries of our property. Neither the purple nor the yellow lines on the aerial photo you provided us seem to match the actual property boundaries. The purple lines do appear to match the approximate layout of our property and that of our adjoins, as our neighbors to the west have a lot the same depth (north-to-south) as ours and the lot of our neighbors to the south is the depth (east-to-west) of both our and our westerly neighbors lots combined. The lot of the neighbors two lots to the south of us is not quite as deep (east-to-west) as the neighbors directly south of us. The lot two lots west of ours is as deep (north-to-south) as ours and our southerly neighbors combined. The pink dashed lines on the attached copy of a portion of the aerial photo you provided us represent the most likely actual property boundaries as staked per the attached survey.

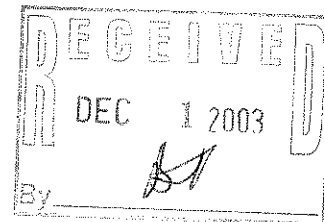

Please call if you have any further questions 785-2745 (home), or 533-5643 (work).

Respectfully,

Benjamin Pack
