RE: Snake River Basin Adjudication claims 37-4323 and 37-4325

Dear Mr. Anders:

I have enclosed a duplicate copy of several deeds and patents pertaining to the land on which this water is used and diverted. Please place a copy with each claim. The reason for the joint exhibit is because Johnson Spring is adjacent to Camas Creek and one of the points of diversion is at the confluence of the creek and the watercourse from Johnson Spring. The other point of diversion is upstream on Camas Creek. The water from both sources is used on the same land. I would request you put a copy with each application.

These documents show some of the chain of title on the transfer and purchase of the land to the present. As you note we are back to the 1920's on the land. I could not find any specific document which establishes the particular date of the initial diversion of the irrigation water. I would assume the dates of priority would be based upon the date the land was settled and proved up or the date of the patent. Also it could have been determined by the first adjudication of many years past.

To my knowledge there has been no objection to the use of the water in these claims during the years I have been in the family, which has been approximately 20 years. During the dry years the amounts used would be 100% of the flow from Johnson Springs and Camas Creek at those two points of diversion. During this use I do not believe there was any objection made. My wife who now owns the land with her sisters cannot recall any time the water was not used by her father and grandfather.

I checked with the Big Wood River Water Master's office and they have records back to the 1920's, but nothing earlier. Too many people have died to give historical information.

Ann Anderson will attempt to garner further historical information in the future and it will be provided, if any.

Respectfully,
