Subject: 21-07076 & 21-07141

Danni from your State Office sent a few water right reports to me as a courtesy. I don't want to get too far ahead of the Department as recommendations are prepared. However, water right nos. 21-07076 and 21-07141 have diversions on NFS land. They also purport to irrigate National Forest System (NFS) land as well as private land. I have found that the diversions on NFS land are in various stages of being approved and are OK. In addition, the irrigation encroachments onto NFS land were known and have been alleviated. With this in mind, both water rights appear to irrigate 2 acres in the SWSE of Sec 2, and 2 acres in the NENE and 10 acres in the SENE of Sec 10. I draw this to the Department's attention now so that as the recommendation for these water rights is prepared, the agent can assure that these parcels of NFS land are not shown as being irrigated.

If you have any questions about this matter please contact me. Thanks for your help on these. Hope you're staying busy.
