Boise, ID 83711-4449

Your signature or signature of attorney
mailing on your behalf

RESPONSE TO OBJECTIONS TO WATER RIGHT NO. 27-2069

ELEMENT NO. 3: QUANTITY. Dennis M. Lake, holder of water right 27-2075 does not object to a volume limitation of this water right provided it is calculated as diversion rate x length of time for the entire season of use.

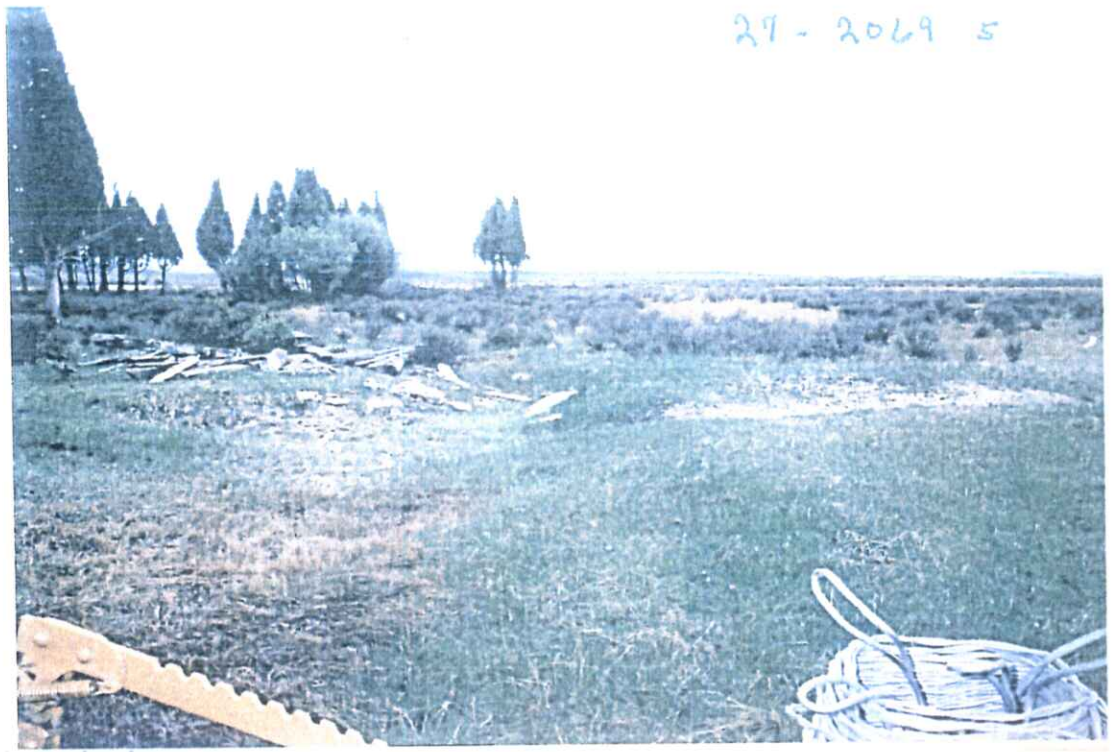

ELEMENT NO. 11: WATER RIGHT SHOULD NOT EXIST.
This water right has a priority date of August 30, 1918.

Appended hereto are copies of photographs 27-2069 1 through 27-2069 8, indicating diversions (27-2069 1 and 2, as well as ditches and dykes illustrated on the remaining six photographs, all of which indicate that the property in question has been and is subject to man induced irrigation.

The water right has been used consistently at all times within the memory of the claimant, including the time period within 1987 to 1992. The headgate can be partially closed to force water west and south, which in turn provides sub irrigation for the land to which the water has been beneficially applied.

The source of water, a spring, originates on private land, and is either applied to beneficial use subject to this permit, or otherwise sinks naturally before it reaches a natural water way. No third persons have historically used or claim any use to the water in question, which apparently has been used continuously since 1918.
