- Salisbury owns ≈ 108 of the remaining 320 decreed acres. Of that 320 acres only 183 acres are above water.
- Salisbury should get ~~108~~ 108 in for his 108 acres as the decree states 1 in 10 acre. That calculates out to 2.16 cfs.
- Salisbury is claiming all of the ~~land~~ land he owns that this right was decreed to. The rest of the land he owns is not decreed under this water right. ~~444444~~
- Howard creek and Targee creek are decreed to this land and seem to adequately irrigate the remainder of the land above water.

There is 183.22 acres left
of the Decreed POV. I used
that acreage to proportion out
the appropriate cfs at .035
cfs/acre I then allotted each
person ~~an amount of~~ 1 acre
to the inch for irrigation as
was decreed.

Salisbury gets 106 of
258.5 acres with 5.17 cfs
