

12-28-05

We received a claim from Stinson claiming 26 acres of irrigation and stockwater. After receiving this we noticed that the claim overlapped a license already claimed by Stinson's father. We called Stinson and he said he was not aware of the license. Because of the new claim error and I decided to raise the irrigation ~~acres~~ shape for the license of the new claim (21-13016). What was claimed in the new claim we assumed to be more accurate than I had originally guessed so I made the changes. Irrigation for 21-13016 will be disallowed and recommended as the license 21-2083. Stock water will be recommended
