EXPLANATORY MATERIAL: BASIS OF CLAIM - Beneficial Use

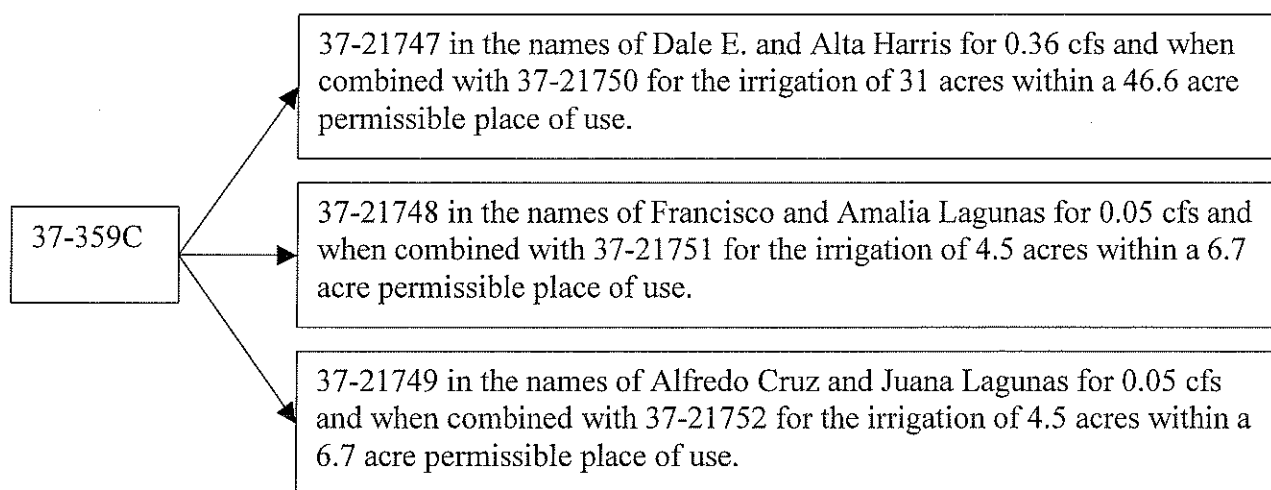

Use of this right is combined with water from Big Wood Canal Co.

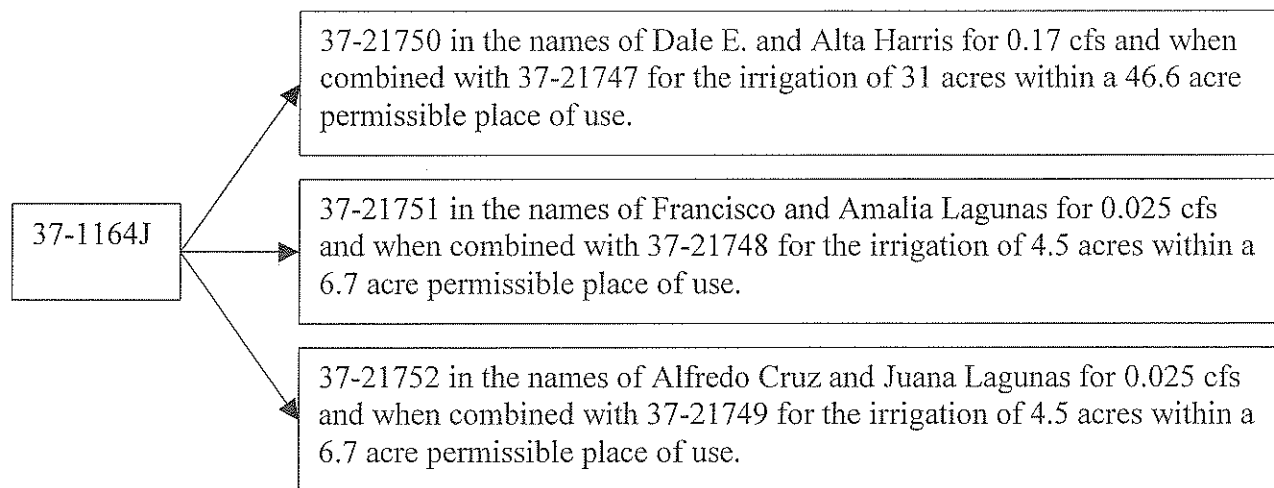

Explanation for the Notice of Completed Administrative Proceeding for Subcase Nos. 37-359C and 37-1164J

Claim nos. 37-359C and 37-1164J were filed Dale E. and Alta Harris in September of 1988 for 0.46 cfs and 0.22 cfs respectively, for the irrigation of 60-acre permissible place of use. These claims were two of several claims for portions of decreed water rights 37-359 (3.00 cfs) and 37-1164 (2.40 cfs). When the investigation of the claims in the area known as Basin 37, Part 1 Surface Water began, the original claim files for claim nos. 37-359C and 37-1164J could not be located. The working investigation file was created using copies of the claims printed from IDWR's microfilm.

Because the original decreed rights had been split multiple times, the delivery records of the watermaster for Water District 37 were used as part of the claims investigation process to determine how much water each claimant was historically delivered for their portion of the decreed rights. The printout of the watermaster's delivery records from March of 2003 indicated that the claimants Dale E. and Alta Harris were entitled to 0.36 cfs of the 37-359 water right and 0.17 cfs of the 37-1164 water right. These are the quantities recommended in the Basin 37 Part 1 Surface Water Director's Report for claim nos. 37-359C and 37-1164J with the irrigation of a combined total of 40 acres within a 60-acre permissible place of use.

In April of 2006 the original claim files for 37-359C and 37-1164J were located, and two unprocessed changes of ownership were found for each claim. The changes of ownership revealed that in March of 1999, Dale E. and Alta Harris had split off and sold two parcels from the 60 acres described as the permissible place of use for claim nos. 37-359C and 37-1164J. To implement the changes in ownership, each claim will need to be split three ways. A summary of the element's of the water rights affected by the splits is illustrated below:

As illustrated above, the sum of the quantities of water for the splits of 37-359C equals 0.46 cfs, which is the same amount that was originally claimed for 37-359C, but 0.10 cfs greater than the amount recommended in the Basin 37 Part 1 Surface Water Director's Report for 37-359C. Similarly, the sum of the quantities of water for the splits of 37-1164J equals 0.22 cfs, which is the same amount that was originally claimed for 37-1164J, but 0.05 cfs greater than the amount recommended in the Basin 37 Part 1 Surface Water Director's Report for 37-1164J. This is because at the time it made its recommendations, IDWR was not aware that Water District 37 had reduced the amount of water shown in its records as being delivered to the claimants, Dale E. and Alta Harris, for their portion of water right nos. 37-359 and 37-1164 by the amounts appurtenant to the two parcels of land that they had sold in 1999. Since IDWR thought the quantities listed in the watermaster records were for the entire 60-acre permissible place of use that was originally claimed, instead of the 46.6-acre permissible place of use that is now owned by the claimants, the total quantity of water recommended should be increased to reflect the amount of water appurtenant to the two 6.8-acre parcels¹ that the claimants sold in 1999.

Dale E. and Alta Harris also filed a wastewater claim, 37-11247, which overlaps part the permissible place of use for claim nos. 37-359C and 37-1164J. The condition describing the combined acreage limits for claim nos. 37-11247, 37-359C and 37-1164J will be affected by the splitting of right nos. 37-359C and 37-1164J. A Notice of Completed Administrative Proceeding is also being filed in subcase no. 37-11247 to reflect the changes to the total combined acreage limits for what will now be claim nos. 37-11247, 37-21747 and 37-21750.

¹ 6.7 acres are irrigated in each parcel.
