1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

This quantity of water is not adequate.

2. Describe the changes you wish to make in the proposed recommendation:

I wish to change the quantity from 0.340cfs to 0.60cfs.

3. Give a brief explanation as to why you disagree with these portions.

Jim Zimmerman, who worked for the SRBA, was here last year and measured the flow, and that we were currently using about 0.60cfs. That was our normal usage. Due to coarse, loose soil conditions I do not believe that 0.340cfs will even get to the end of the irrigated land, let alone get it damp.

I AGREE with this proposed recommendation: no changes need to be made.
