NOTICE OF ERROR
REPLY

Please type or print clearly, fill out this form completely and mail.

Return this reply form to IDWR by the deadline date printed below if you want IDWR to change your recommendation or you want to let IDWR know that you agree with its recommendation.

YOUR DEADLINE FOR RETURNING A NOTICE OF ERROR REPLY IS: September 29, 2006

Water right number: 63-228

THE RIVERSIDE IRRIGATION DIST LTD
PARMA ID 83660

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

See attached

2. Describe the changes you wish to make in the proposed recommendation:

See attached

3. Give a brief explanation as to why you disagree with these portions:

See attached

☐ I AGREE with this proposed recommendation: no changes need to be made.

DATE:

9/29/2006

Re: Riverside Irrigation District Ltd.

***Water Right Nos. 63-226, 63-227, 63-228, 63-229, 63-299, 63-300
63-2279, 63-2374, 63-2389, 63-4007, 63-4008, 63-4009 and 63-4010***

Ladies and Gentlemen:

As counsel for Riverside, I am submitting the attached Notice of Error Replies for each of these water rights held by Riverside Irrigation District Ltd. As the comments and Notice of Error generally apply to all of the rights, please consider this letter as incorporated into each of the Notice of Error Replies.

1. Riverside Irrigation District objects to the place of use. The proposal shows 9433 acres total. The place of use should be 9845 acres based on the modifications contained in the attached maps dated September 15, 2006, plus those additional areas depicted on the attached maps enclosed herewith. Also enclosed are affidavits of the Directors of the Riverside Irrigation District explaining the use of certain areas as indicated in the maps. The modifications consist of irrigated areas not included in the September 15, 2006 calculations, plus irrigated areas on drain banks as described in the affidavits. Riverside believes that the total acreage is in excess of 10,000 acres, but have not been able to calculate the additional acres that should have been included using the Department's ArcView program. Riverside requests that the Department update the total acreage within the place of use based upon the modifications to the maps as attached hereto, and utilize the acreage resulting from that re-calculation in describing the place of use.

The place of use also states that there are 9433 acres within the "Idaho boundary" of the District. Riverside Irrigation District straddles both Idaho and Oregon, and the total acreage is combining Idaho and Oregon acreage. Riverside also believes that the 4009 acres described as irrigated within the State of Oregon is inaccurate and does not capture all the Oregon acreage. Riverside questions the need to describe acreage in Oregon or Idaho, as the water right is appurtenant to the entire place of use and water can be moved within the place of use regardless of political boundaries. Riverside requests that the reference to specific acres in Oregon be deleted. If necessary to include specific amounts of Oregon acreage, the totals should be recalculated to show the acreage on the attached maps, prepared on September 15, 2006, along with the modifications shown on these maps.

2. Period of use. Was the subordination language in the period of use for storage intended to apply to diversions out of the Boise River below Star such as the Riverside Canal? Riverside understood that language was used above Star only.

3. Water right number 63-2374. Enclosed is a copy of the original, signed Notice of Claim filed with the Department. The Department requested a re-execution of this Notice of Claim. Riverside has since located this previously executed copy.

4. With respect to water right numbers 63-4007 (Meadows Gulch Drain) and 63-4010 (West End Drain), Riverside objects to the quantity proposed. In the case of 63-4007, the quantity proposed is 5 cfs. The amount claimed was 10 cfs. The Department has not explained the basis for reduction in the amount claimed. With respect to 63-4010, the quantity recommended by the Department is 30 cfs. The quantity claimed by Riverside is 70 cfs. Again, the Department has not explained a basis for reduction of the claims. The amount should be recommended as claimed.

With respect to water right number 63-4007, 63-4008, and 63-4010, enclosed are the original Claims for Water Right that were filed with the Department in 1967, long before the commencement of the Adjudication, demonstrating the quantity and location of the water right. The Department has requested a flow measurement for water right numbers 63-4007, 63-4008, and 63-4010. These drains run into the Riverside Canal and dump water directly into the Riverside Canal without a measuring device. The Department did not make the request for a flow measurement until the end of this summer, at which point a measurement would not accurately capture the volume of water flowing into the Riverside Canal from these three drains. Accordingly, Riverside, at this late point in the season, cannot provide the Department with the requested flow measurements.

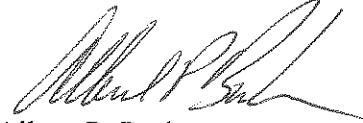

Finally, there does not appear to be a preliminary recommendation for water right number 63-4009. It should be recommended as claimed, with the same adjustments for the place of use and acreage as with all the Riverside water rights.
