Dear Ms Sherman:

I talked to you several weeks ago concerning my water claim, #67-14766, basically for the increased cost. Following your recommendation I talked to the individual in your records office (forgot her name). There are no records of my well, which is the problem I encountered. Therefore, we will have to use the end of 1970, the year the house was built, as a date due to lack of data.

This is a bit late, as I was debating if it was worth the extra \$75 to register a domestic water well, however my neighbor, a native of Council, recommended I continue.

Thank you for your help and guidance;

Scott A. Jones
