REPORT OF ENGINEER

Permit No. G-23784

This proof is for Completion of works & Beneficial Use In Water District No. _____

1. Name of applicant State Land Department, Boise, Idaho
2. Source of water supply: An artesian well
3. Location of point of diversion: Is in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 20
T. 4 N. R. 2 W. County of Canyon
4. Describe works as they exist, giving dimensions and capacities of same: This is a small flowing well in the NE corner of the Park. Well casing is 4" diameter. There is a 2 $\frac{1}{2}$ " pipe from the cap that reduces to a smaller pipe. Water is flowing into a watering trough for the farm on the East side of the park. Rather small flow now, less than ~~three~~ one inch. In summer time water from it is made available for the use in the park.
5. Park is irrigated by gravity from another source.
Water is used for: irrigation and domestic purposes
6. State whether or not water has been turned into works of diversion: yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

Ward Massacre Memorial Park, in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 20, Twp. 4 North, Range 2 West, B. M.

Park is approx. one acre in ~~xxx~~ area.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach? Boise River

Remarks: This could be fixed up much better for park usage, perhaps a fountain could be built, and it would certainly improve things to pipe it away from the cattle pens. At present it belongs more to the farmer than to the Park.

This examination was made on the 16th day of February, 1956.
