Re: Claim No(s). A63-04175

& A63-04176

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is **NOT** to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water. Any other claims you may have filed, that are not listed above, do not require evidence of priority be submitted at this time.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary along with examples of types of evidence that can be submitted to fulfill this requirement. If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify claims in this area are now being conducted by Department personnel. Please contact this office as soon as possible to schedule a field exam appointment convenient for you.

The required evidence supporting the priority date(s) must be submitted by September 1 1995, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter, or the enclosed pamphlet, please call the Western Region office shown above.

INSTRUCTIONS

Your claim should set forth all necessary information to describe your claimed right. Failure to give enough information may make your claim of little value. Some of the items in the form may not apply to your situation. Please use additional sheets if space provided is not sufficient to fully answer the questions.

Paragraph No.

1. Give full name and post office address of person or company making the claim.
2. Describe the point of diversion by 40-acre subdivision. Give the name of the source, the drainage to which it is tributary if surface water, and the county in which the point of diversion is located. If there is more than one point of diversion, list others in the remarks section.
3. Give the priority dates and the quantities of water that you claim. You should accurately list the dates that you initiated each new use of the water. List separately the dates and amounts of water involved in each enlargement of the diversion. (Example: if you diverted 0.8 c.f.s. of water for irrigation on May 18, 1871, for the first time for use on 40 acres of land, and then later you enlarged the diversion by diverting an additional 0.4 c.f.s. of water to irrigate an additional 20 acres of land on June 1, 1901, your right should be described as follows:

Date of priority claimed:	May 18, 1871	amount:	0.8 c.f.s. or	_____	acre feet
	June 1, 1901	amount:	0.4 c.f.s. or	_____	acre feet
	Total claimed:		1.2 c.f.s. or	_____	acre feet

Since the water was used for irrigation between April 1 and October 31 on that particular farm, part b. would be completed as follows:

use irrigation period of use from April 1 to October 31 (both dates inclusive). If the water had been used for any other purpose, you would have described the priority date, amount, use, and period of use in a similar manner.

4. Describe the diversion works and explain any changes since the right was first initiated.
5. If the water is used for irrigation, give the total acreage and list the lands irrigated by 40-acre subdivisions and complete the other questions.
- 6, 7, & 8. Describe any other uses of water.
9. In the remarks section, give any information or details that you feel are not fully covered or that need clarifying. You might explain your operation, where the water is returned to if for an industrial or non-consumptive right, the condition and temperature of the returned water, and any other information to help explain your claim.

You may wish to include as a part of your claim, affidavits of witnesses who are familiar with your right and who have a personal knowledge of the circumstances which you have described in your claim. You may submit maps, drawings, certified copies of posted notices which may have been filed in the county courthouse, water measurement records, or any other document which you feel will support your claim.

Your claim will be advertised in a county newspaper for two weeks. Exceptions to your claim which dispute the water right that you have described may be received by the Department of Reclamation and you will be provided a copy of such exceptions.

The fee for filing this claim with the Department of Reclamation, Room 107, Statehouse, Boise, Idaho 83701, is \$10.00.

NOTICE OF CHANGE IN WATER RIGHT OWNERSHIP

Please print or type. Attach pages with additional information. Instructions are included at the end of this form.
 Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts.
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7. If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

RE: NOTICE OF CLAIM NO(S): A63-4175, 63-4176

Dear Claimant(s):

We are currently preparing the Notice(s) of Claim referenced above for the Director's Report in the Snake River Basin Adjudication. Our research indicates there may have been a change in the ownership for the above claim(s). IDWR records currently show the following name and address as the owner of the claim(s) listed above:

**BRADFORD SHAW
4937 N HOLLOW LN
BOISE ID 83702**

If our current records, as listed above, are not correct please complete the enclosed Change in Ownership form, as appropriate, to correct our records.

If no response is received from you, all further legal notices concerning the claim(s) will be sent to the name and address shown above. If you have claims other than those referenced here, please contact the Department so we may assist you in updating the information for all your claims. Should you have any questions, or feel that you need assistance, please contact IDWR at (208) 334-2190.

Sincerely,

Adjudication Staff

Comments:

1. csaxton 8/14/2003 Diversion Rate

Comment: Mannings measurement conducted on 8-12-03 determined that waste ditch has the capacity to convey 1.47 cfs. Recommend 1 inch per acre.

2. csaxton 8/14/2003 Priority Date

Comment: Priority date evidence is statement from claimant on 8/6/03 during filed exam where he said that a pond was built in the 1950s, and at that time the waste water was being used. Must recommend beginning of the irrigation season in 1959 without further evidence.

3. csaxton 5/25/2004 Approved Transfer

Comment: Transfer 71048 altered this claim. Recommendation changed to represent approved transfer 71048. all previous notes are related to claim review prior to approval of Transfer 71048.

Comments:

1. csaxton 8/14/2003 Diversion Rate

Comment: Mannings measurement conducted on 8-12-03 determined that waste ditch has the capacity to convey 1.47 cfs. Recommend 1 inch per acre.

2. csaxton 8/14/2003 Priority Date

Comment: Priority date evidence is statement from claimant on 8/6/03 during filed exam where he said that a pond was built in the 1950s, and at that time the waste water was being used. Must recommend beginning of the irrigation season in 1959 without further evidence.

Subject: Bradford Shaw application for Transfer and SRBA claims 63-04175 and 63-04176

I have completed SRBA recommendations on 63-04175 and 63-04176. It was brought to my attention that a transfer has been filed on these two rights and the recommendations needed to be done promptly. Well...that didn't happen... but they are done now.

Note that the application for Transfer of a water right asked to move 23 of 60 claimed acres. I found 13.6 acres total being irrigated from the waste water source and Ten Mile Creek (both overlapping). The majority of the 60 acres claimed under the two above mentioned rights is irrigated under Boise-Kuna Canal company.

In addition, recommended priority dates for both claims were reduced compared to what was claimed based on available evidence.

When leaving the field exam I informed Mr. Shaw that my intention was to recommend these two rights significantly different than what was claimed. So this shouldn't be a big surprise.

Let me know if you have any questions.

Comments about the measurement:

The results of the calculation are:

The length of the channel measured is 337 feet.

The upstream and downstream rod readings are 4.72 and 5.92 feet.

The channel cross section is 2.54 ft-sq.

The wetted perimeter is 5.99 feet.

The hydraulic radius is 0.42 feet.

The slope is 0.0036

The roughness coefficient is 0.0500

The flow velocity is 1.003 ft/sec.

The rate of flow is 2.55 cfs.

III. History of Water Resource Development

Prior to Federal Development

In August 1862, miners found gold in Grimes Creek, about 40 miles north of the present city of Boise. The discovery caused a significant migration into the Boise River drainage and by 1863, 19,000 people had relocated to the area. The population was generally dependent on food and supplies imported from Oregon and Utah.

Although the population center was to the north in the mining areas, by the summer of 1865, most of the river bottom land in the Boise Valley was under irrigation; crops included grains, vegetables, and fruits. Irrigated agriculture expanded to higher lying bench lands as crop yields and produce prices increased. These lands, unlike the bottom lands, were more difficult to irrigate and water delivery was dependent on engineering expertise and capital. Companies with broad-based financial capability were formed by private investors to promote bench land development.

One of the early developments (1865) was the Ridenbaugh Canal which began as a modest undertaking of 2-1/2 miles to provide water for irrigating about 640 acres, to power flour and sawmills, and to transport logs. William B. Morris acquired the ditch and in 1877 filed for water rights of 100 cubic feet per second (cfs). In 1888, William H Ridenbaugh, nephew and successor to Morris, filed for water rights of 600 cfs. Through a series of transactions, interests were sold, and a main canal (12 miles), two branch canals (25 miles), a Nampa Canal through Deer Flat Valley (45 miles), and a chain of 10 reservoirs were constructed. One-third of the Boise River flow was required for the development in low water years. The system was acquired by the Nampa and Meridian Irrigation District in January 1906.

Another expansive effort was that of the Idaho Mining and Irrigation Company which in 1882 filed two claims totaling 3,000 cfs of water for mining, milling, and agriculture purposes and proposed construction of two canals. The New York Canal, which is currently one of the main diversion canals, was begun as an effort to provide water to the southern bench lands in the eastern area of the Boise Valley. The history of construction is mottled with several starts, financial failures, and repurchase of assets. In 1894, the New York Canal Company was formed from two groups of farmers and 25 miles of canal were completed in 1900. The New York Canal Company was eventually succeeded by the current New York Irrigation District.

The Phyllis Canal, which extends some 35 miles from its diversion near Eagle Island was the effort of the Idaho Mining and Irrigation Company for a canal to serve the western area of the Boise Valley. It was completed in 1891 and sold in 1902 to the Pioneer Irrigation District which also acquired the Caldwell Canal.

An effort to irrigate lands on the north side of the Boise River west of Middleton was initiated in 1874. Subsequently additional filings and enlargements of the canal were made and Howard Sebree extended the (Sebree) canal to a 20 mile-long system in 1888. This system was purchased by the Farmers Cooperative Ditch Company in 1902.

A canal company to divert water to the opposite side of the river from the Sebree Diversion was formed, sold, and resold. The canal was purchased by the Riverside Irrigation District in 1893 and increased to 30 miles long by 1903.

Another major canal system was initiated in 1884 by settlers to irrigate lands in the vicinity of

George W. Whitmore being first duly sworn,
deposes and says: On early 1929

I can clearly remember my
mother and father Jay and
Emma Whitmore early Boise
Valley Pioneers who had land
interests in this area of
water claim. This ranch
was irrigated from Ten
mile creek before the construction
of the New York Canal, the ranch was the
stage stop on the way to Owyhee County it
was an irrigated pasture and was considered an
oasis in the desert.

George W. Whitmore
(Signature)

Subscribed and sworn to before me this
day 23rd of August, 1995.

Mary B. Kelleher
(Notary Public)

Residing at Kuna, Idaho.

My Commission Expires 3-30-2000.
